

Sofvie Client Status Dashboard

Context

This is an internal dashboard that helps to better understand sales targets and statuses for product enhancement and gap analysis in data to show more insights. The long-term goal for this dashboard is to create a predictable forecast of sales and requirements.

Content of Web App

The web app consists of a navigation bar with buttons that guide the navigation of the page. These buttons include:

- Dashboard
- Summary
- Active Users (Valid Email)
- Active Users (Invalid Email)
- Inactive Users (Valid Email)
- Refresh Page

Note: the refresh button must be placed at the extreme top right of the dashboard.

In the card section, the `<div class="tile is-ancestor">` tag is used with `<div class="tile is-parent">`
`<article class="tile is-child box">` to create cards. This process will be repeated four times to insert four cards.

Notes: Keep the main page dashboard just to one page (no scrolling)
